NEWS LETTER

Issue 8

A Little more Flexibility

DECEMBER 2011

BUS BAR PRODUCTS

These products continue to show steady growth and have performed very well during 2011 and look to continue this trend into 2012.

USA BUSINESS

There are early signs that the level of our business in the USA is increasing which, if it continues will restore the USA as a major sales area for GTS.

MEDICAL DEVICE

We have received news that a breakthrough in heart problem detection has been achieved by one of our customers, where a GTS laminate has been used as a major part of a new analysis system. When rolled out it is expected to save a considerable amount of time and money for hospitals as the problem can now be detected in minutes rather than days.

PRODUCTION LEADTIMES

The improvement in supplier's delivery performance has resulted in better lead times being possible in most areas.

PRODUCTRONICA 2011

This exhibition was again attended by GTS and a number of valuable leads identified. These will be followed through by the relevant sales personnel.

CHRISTMAS SHUTDOWN

Please note that the offices and factory will be closed from 23rd December 2011 until it reopens on 3rd January 2012.

Merry Christmas to you all and Happy New Year from all the Staff at GTS.
